

Developed and Supported by VeriFone

From the convenience of your office, access your reports and C-store info, make price changes, and add products to all of your Ruby locations.

## Ruby Manager Remote™

Ruby Manager Remote allows you to access your Ruby sites from the convenience of your central office. Now you can pull your reports, send price changes, add products and employees—all from one location.

Not only will you have instant access to all of your locations, the Remote Scheduler can be programmed to automatically send or pull data at preset times. You can set the scheduler to pull reports at night, so they will be conveniently waiting for you when you arrive at work in the morning.

Printing cashier reports, adding PLUs, and updating softkey layouts has never been easier. These functions can be properly completed from the host PC, reducing employee data input errors and providing them more time to concentrate on customer sales.

With the easy-to-use tab and grid system, you can group changes quickly, so changes are just a point, click, and drag away. An optional keyboard-compatible scanner allows you to speed up the process even more by scanning items directly into Ruby Manager.

Scheduler **automatically** calls the sites to pull/send data

**Instantly** send price updates to all of your stores

Keep a **central database** of all your sites' reports, products, and prices

**Eliminate** long waits for reports

### Benefits at a glance

# Ruby Manager Remote

## Remote Access

With remote dial-up communication capability, you can pull and send data to any of your Ruby locations at any time. You have instant access to all of your reports, prices, and totals.

## Scheduler

Program the Scheduler to automatically call your stores to pull reports and send price changes. Pull reports in the middle of the night as you sleep.

## Reports

Ruby Manager Remote dramatically increases your report efficiency and usability. Reports print in easy-to-read, full-size paper format, eliminating the need to scroll through register tapes. You can also save up to 1,000 reports of each type: cashier, shift, and daily.

## Create, Delete and Change Datasets

Create PLUs; delete former employees; and change security levels, fuel prices, and DCR promo messages quickly and easily from your PC without interrupting inside sales.

## Table and Grid Format

The convenient table and grid structure allows you to manipulate groups and categories, putting the information you need in a quick and easy-to-find arrangement.

## Import/Export

You can easily import and export datasets and totals to other financial/accounting programs in an ASCII format. Produce custom reports to meet your needs with Microsoft® Excel or Access.

## Specifications

### PC Requirements:

Microsoft® Windows® 2000 Professional (SP3), XP Professional, or NT 4.0 (SP6)

Intel Pentium® 133 microprocessor or faster  
51 MB hard drive space, 64 MB RAM

Specified external modem must be connected to the Ruby

Dedicated host PC and phone line recommended for communication

Available USB or parallel port for HASP key (HASP key, included in purchase, is required for program operation)

### Ruby Requirements:

Ruby application must have RubyLink for communication protocol

### Ordering Information:

Ruby Manager Remote (RMR)	V040-10-101
Software license required for more than 10 sites.	
Software License, 11-50 sites	P040-10-102-LI
Software License, 51-100 sites	P040-10-103-LI
Software License, 100+ sites	P040-10-104-LI

Must specify type of HASP key needed: USB or parallel  
Note: PSP Help Desk required for the first year.
