

accounting

ePB Accounting™ is the most cost conscience, secure, true web based application that lets users access and review store(s) sales and invoices; manage product pricing, promotions and inventory; handle fuel prices as well as integrate with major general ledger solutions. Users have the flexibility and freedom to do any task anytime, anywhere, without the need of having a PC at the store(s).

Top Features

- Manage store(s)'s price book on-site or remotely by item, group, department, zone and vendor
- Promotion may be automatically scheduled and discontinued by day of the week or time of the day
- Receive electronic invoices from your wholesalers that will automatically alert you to new items or changing costs
- Global price changes by creating customized groups
- Control inventory at the item level
- Print barcodes and shelf labels with item description, UPC, effective date and retail price
- Perform store's daily reconciliation per shift or day and audit POS transactions
- Powerfull lottery tracking tool by reviewing each ticket sales and controlling lottery inventory
- Compatible with all Quickbooks™ versions from 2002 - 2013, PC Quickbooks versions, MAS90™, MAS200™ and MAS500™
- Track key inventory by keeping count of the store most important items and auditing them at the end of every shift

Key Benefits

- **Increase each store's profit by more than \$30,000 per year****
- **Eliminate cashier ring errors**, reduce cashier training time by up to 50% or more, minimize shrinkage to less than 1% and increase store revenue 5%+
- **Improve store's performance** – ePB Accounting is a great tool that help users spot sales trends, get better purchase power, determine best and worst selling items
- **Low investment** – ePB is a very affordable web based store automation solution
- **Easy to use** – manage the store prices easily without the worry of clerks making mistakes
- **Wholesaler link up** – receive electronic invoices, price updates and new items from the store's wholesalers
- **G/L Sync™** – open architecture keeps you tie into most accounting software
