

Get The Most Out Of Your Buying Strategy

PriceCheck™ compares wholesale prices for convenience store operators. Using our proprietary database of wholesaler prices, our retailer members compare their invoices against real-time supplier prices to ensure and verify that their suppliers are offering them the best available price on each SKU.

how it works

service levels

- A license of ePB™ back office solution
- All the features on PriceCheck on the ePB™ version of your choice
- Compatible with most POS terminals in the industry

benefits

PRICE COMPARISON

Are you getting the best prices at your retail store? Compare your vendor item prices with our vast database and verify that your vendor is offering you the best available deals. Detailed pricing information is a critical fact that gives you better leverage at the moment you are negotiating with your vendor

TRACK PRICES

On average, a convenience store has between 3,500 to 4,500 items. Your store prices are constantly affected by manufacturers and vendors. Controlling prices is a time consuming task. How can you track your store prices to optimize your profitability? ePB™ lets users view item price history, compare vendor prices and easily identify cost and manage changes. You can even send your price changes to your register if you link your POS terminal to your ePB™ account!

MANAGE YOUR E-INVOICES

Engage in electronic invoicing with your vendors with ePB™, and watch unnecessary costs and errors evaporate. ePB™ gives you the ability to receive your purchase invoices from your suppliers electronically. On average, a retailer will purchase 65-80% of a store's merchandise from their major food supplier. Keeping on top of price changes, stock outs, and merchandise received is essential for the profitable operation of a store.

INTEGRATION WITH ePB™ PRODUCTS

PriceCheck™ is compatible with all of Success Systems' ePB™ back office solutions. As a virtual office – available anywhere, anytime – you can manage your store(s)' operations, margins, prices, vendor costs and invoices from one integrated application. ePB™ is a cloud-based application designed specifically for petroleum retailers, grocery, tobacco, liquor and c-store operators. We offer the most recommended back office solution for your specific needs.

about us

Success Systems®, specializes in providing "best in class," turnkey store automation services to convenience stores as well as grocery, liquor, tobacco and gasoline retailers. The company believes that understanding the day-to-day pressures of our customers is a mission-critical element to a successful relationship.
